

SPECTACULAR SPACES

WITH

STEEL

Sculpting Spaces with
the Modern Elegance of Steel

Steel in The Heart of Modern Design

Steel has long been the silent architect of exteriors, yet today it graces the world of interior design with newfound finesse. Shedding its industrial roots, steel now embraces a new identity within the realm of interior design — one of sophistication, style, and sustainability.

Steel cladding balances strength with aesthetic grace, modernity with timeless allure. Offering versatility as both canvas and frame, every steel texture and finish tells a story, sculpting interiors that are as sustainable as they are stylish. With steel from BlueScope, the possibilities are boundless, from high-gloss polished surfaces that capture the light to muted, textured finishes that whisper understated elegance.

Why Steel?

The Steel Advantages

Steel cladding is redefining interiors with a blend of sophistication and strength, an architectural choice that enhances spaces with style and substance.

- Design Versatility** From minimalist to industrial styles, steel adapts seamlessly, enhancing spaces with cohesive elegance. Whether in feature walls or ceiling panels, it adds a touch of sophistication that complements any design vision.
- Aesthetic Touch** With smooth lines and polished finishes, steel cladding turns walls and dividers into focal points, introducing a refined luxury that feels both contemporary and enduring.
- Enduring Durability** Built to last, steel withstands wear and remains immaculate, preserving the architectural integrity of interiors over time.
- Fire-Resistance** In high-risk environments where safety is paramount, steel's inherent fire-resilience makes it a sophisticated choice that offers safety peace of mind without sacrificing style.
- Sustainable Choice** Recyclable and eco-conscious, steel aligns with sustainable design values, making it ideal for projects prioritising both beauty and environmental responsibility.

Captivating Finishes & Textures

Crafted with the most discerning designer in mind, our steel cladding presents a spectrum of finishes that seamlessly adapt to diverse aesthetics, from sleek urban modernity to the inviting warmth of timeless design.

Colorbond®

Cladding Iconic Builds with Beautiful Steel

COLORBOND® steel combines the superior strength of Aluminium-Zinc alloy coated steel with proprietary paint system technology exclusive to BlueScope. Enhanced with THERMATECH® solar reflectance technology, COLORBOND® steel offers superior thermal performance by reducing heat transfer through the roof, ensuring greater comfort and reducing energy consumption..

The iconic COLORBOND® range offers a spectrum of hues that cater to every mood and setting. From calming pastels that bathe rooms in a soft, ambient glow to bold, rich tones that add depth and definition, COLORBOND® steel introduces colour with depth and longevity. Perfect for spaces where colour meets creativity, this finish invites designers to experiment and make statements that last.

Available Colours:

Ruby Hibiscus

Sahara Iris

Sunny Marigold

Rose Pink

Sky Brunnera

The colours shown in the colour chart have been reproduced to represent actual product colours as accurately as possible. However, we recommend you to check your chosen colour against actual sample of the product before purchasing, as varying light conditions and limitations of the printing process may affect colour tones.

VERMOE®

Uniquely Textured **Timelessly Modern**

VERMOE® steel is all elegant, sleek and robust with its finely distinctive textured surface gives a new breath to architectural perfectionism, achieving a more unique outlook for your design. Engineered with BlueScope's Aluminium-Zinc alloy coating technology, VERMOE® steel is as durable as it is beautiful, flaunting great colour stability and exceptional corrosion resistance which helps to create an impression that lasts.

Available in 3 alluring colours, its subtle, tactile finishes create walls and surfaces that demand attention, capturing light and shadow in a way that feels organic yet strikingly modern. This range is ideal for feature walls and partitions, adding a layer of visual and textural intrigue to any room.

Available Colours:

Thunder Grey

Dazzling Black

Alluring Brown

However, we recommend you to check your chosen colour against actual sample of the product before purchasing, as varying light conditions and limitations of the printing process may affect colour tones.

Elements®

Nature's Touch with the Strength of Steel

ELEMENTS® steel was developed specifically for solutions that require the strength and durability of steel with the soft touch of nature's wood finish.

Coated with corrosion resistant substrate of Aluminium-Zinc coating alloy coating and high-precision paint coating process, ELEMENTS® steel achieves an authentic wood-grain look that adds a sophisticated, natural aesthetic to any space.

Combining the timeless warmth of wood with the durability of steel, this wood-grain effect introduces a natural aesthetic that complements contemporary interiors without sacrificing the resilience of metal. It's a choice for spaces that aim to feel grounded and welcoming, perfect for achieving a sophisticated harmony between nature and modernity.

Available Colours:

Cherry Mabella

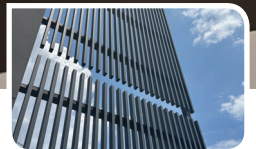

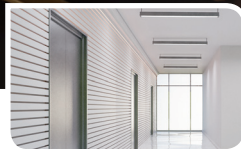

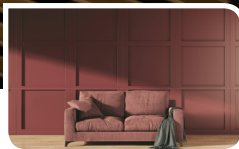

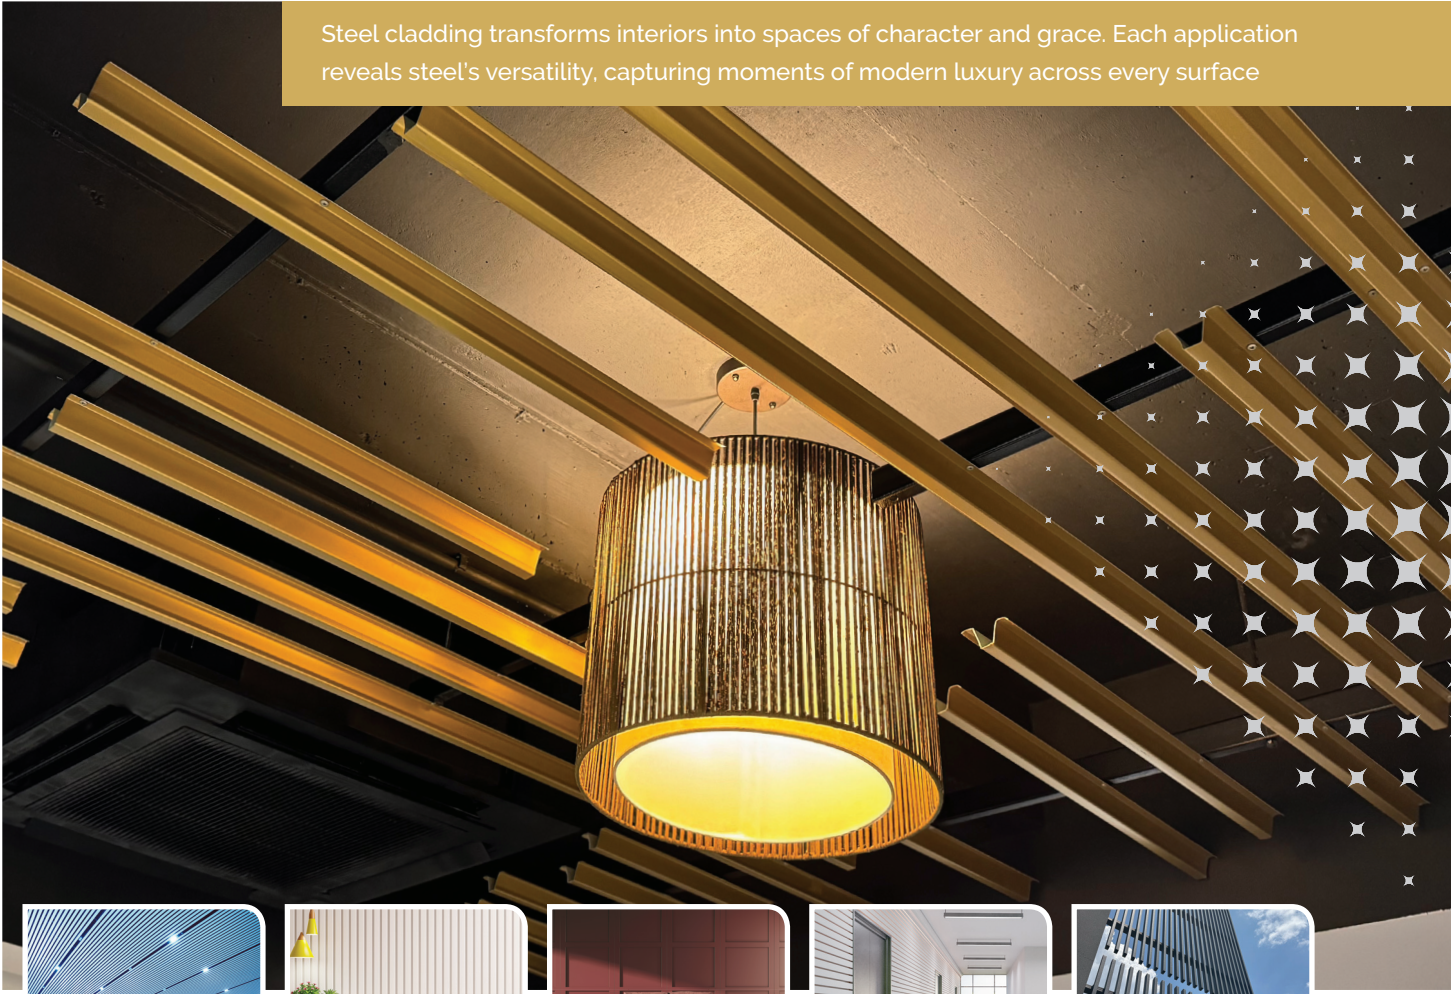

Cherry Pine

The colours shown in the colour chart have been reproduced to represent actual product colours as accurately as possible. However, we recommend you to check your chosen colour against actual sample of the product before purchasing, as varying light conditions and limitations of the printing process may affect colour tones.

with **Sculpting Space** **Steel Applications**

Steel cladding transforms interiors into spaces of character and grace. Each application reveals steel's versatility, capturing moments of modern luxury across every surface

Ceiling Panels

Redefine the ceiling with sculptural steel panels. Adding texture and sophistication, these panels elevate overhead spaces for a striking architectural presence.

Wall Cladding

Infuse walls with a sense of strength and refinement. Steel cladding introduces a rich depth and structure, setting a serene yet bold tone that resonates throughout the room.

Featured Walls

Make steel the heart of the room with bold feature walls. Through a captivating dance of light and shadow, steel feature walls create dynamic focal points that demand attention.

Façades

Blur the lines between interior and exterior. Steel façades flow effortlessly indoors, fostering a sense of continuity and expanding the visual landscape of the space.

Partitions and Dividers

Define spaces while embracing openness. Steel partitions bring a refined structure, offering privacy without compromising light or flow for an elegant balance of form and function.
